

New HMDS Tests Introduced Since 2017

Tests not currently included in scope of UKAS accreditation

TEST NAME	Date submitted for addition to scope (if applicable)	Addition to scope granted
Molecular Genetics:		
CEBP alpha testing	31/05/2018	
CLL marginal zone HTS panel	31/05/2018	
11q gain/loss probe; secondary panel in high grade lymphoma with normal FISH	31/05/2018	
Automated RNA extraction using Maxwell RSC instrument.	31/05/2018	
MECOM breakapart FISH probe	31/05/2018	
Histopathology:		
LMO2 by immunohistochemistry (for Germinal Centre B-cells and related lymphomas)	31/05/2018	
CD13 by immunohistochemistry	31/05/2018	
CD33 by immunohistochemistry	31/05/2018	
HDCA2 by immunohistochemistry (for Germinal Centre B-cells and related lymphomas)	N/A Not yet submitted (validation on-going)	

Tests included in scope of UKAS accreditation

TEST NAME	Date submitted for addition to scope	Addition to scope granted
Molecular Genetics		
Multiplex Ligation-dependent Probe Amplification (MLPA) for copy number abnormalities in CLL	21/07/2017	18/12/2017
EZH2 mutational analysis (prognostic)	21/07/2017	18/12/2017
FGFR3 gene rearrangement in myeloma	21/07/2017	09/12/2017
PML-RARa fusion genes in suspected acute promyelocytic leukaemia (APML) cases (FAST-FISH protocol)	21/07/2017	09/12/2017
DUSP22/IRF4 gene rearrangements in anaplastic large T cell lymphoma and DLBCL	21/07/2017	09/12/2017
TP63 gene rearrangements in anaplastic large T cell lymphoma	21/07/2017	09/12/2017

Flow Cytometry:		
Addition of antigens to the Stem Cell Screen (6-clr to 8-clr) for use in MDS/cytopenia	21/07/2017	7/12/2017
Addition of antigens to the Plasma Cell Screen (6-clr to 8-clr) for diagnosis and monitoring of myeloma and related disorders	21/07/2017	7/12/2017
